

### eVisitor Management System

MicroCenter SPC, one of the flagship companies of more than 32 years old MicroCenter Group. As a leading IT products company it has put the expertise behind the smart solutions. We offer a Visitor Management System (eVMS) that meets the core security requirements of medium and large Organizations.

### Why MicroCenter eVMS ??

In many facilities, visitors are still registered using a handwritten paper log. While this method is perceived as quick and easy, it provides virtually no security and leaves visitor information available for anyone to see. Automated visitor management solutions lend a more professional appearance, enhance security and meet compliance mandates for the collection and auditing of visitor data.

MicroCenter eVMS allows organizations to automate the entire process of registering a visitor, printing a badge and capturing detailed information in seconds by simply reading all GCC Smart IDs and all Passports.

### Benefits of eVMS

- Eliminates need to manually write details of visitors in the registers
- Reduces time consumption and effort for visitors as well as security
- Prevents any incorrect information from being recorded
- Eases analysis of details by generating instant reports
- Bilingual Software (English/Arabic)

## The eVMS Architecture

- **Visits-in:** Reading of all GCC Smart IDs and all Passport for capturing the visitor's details and entering visits detail
- **Visit-out:** A page showing all current visitors and user can view the details of the checked out visitors

### Reports:

With all details about visitors and visits can be generated instantly

### Data Sharing:

Data can be accessed across multiple locations, which helps to store all details of visitors in a central repository

### Blocking:

Blocking visitor from the compound

### Manage Visitors:

The administrator can block or activate a particular visitor

### Visits Details:

The user can filter the data depending on date, time, visited persons, visited locations etc. Receive notifications whenever a visitor arrives at your premises

## Appointment Management

- The secretary/receptionists to raise a request for appointment on behalf of the visitor to the staff/employee.
- Visitors without prior appointments can raise a request for an appointment which would be communicated to the employee.
- The Employee can accept, cancel & postpone the appointment according to this convenience; an email for the same action will be send to the visitor at the same time.
- Appointment Reports: All Reports related to the appointments can be generated.

### VMS Notification: your visitors out of the organization

To: Ahmed

Dear Mr.Ahmed

This is auto generated notification mail from VMS, please do not reply to this mail.

VMS sent this mail to inform you that the below visitors, which were meet you, just now visit-out organization:

Name/ Tel	Nationality	Company
 MOHAMMED ABDULLAH 39556866	KINGDOM OF BAHRAIN	MICRO CENTER S.P.C

This email has been generated on 17 July 2017 09:15 am

## Notifications

- Staff/employee will receive notifications from the system via e-mail/desktop alert or SMS.
- The notifications are sent every time the security supervisor scans the visitor's CPR card at the gate.
- When the visitor exits the organization, the staff/employee receives another notification regarding the same.
- Notifications include the photograph and other necessary details of the visitor.

## Better Security Intelligence

With the help of eVMS interactive dashboards, you can have holistic snapshot of all the visitors who are already inside the premises and visited in the past.

Some of the important dashboards are:

- Today Appointments:**

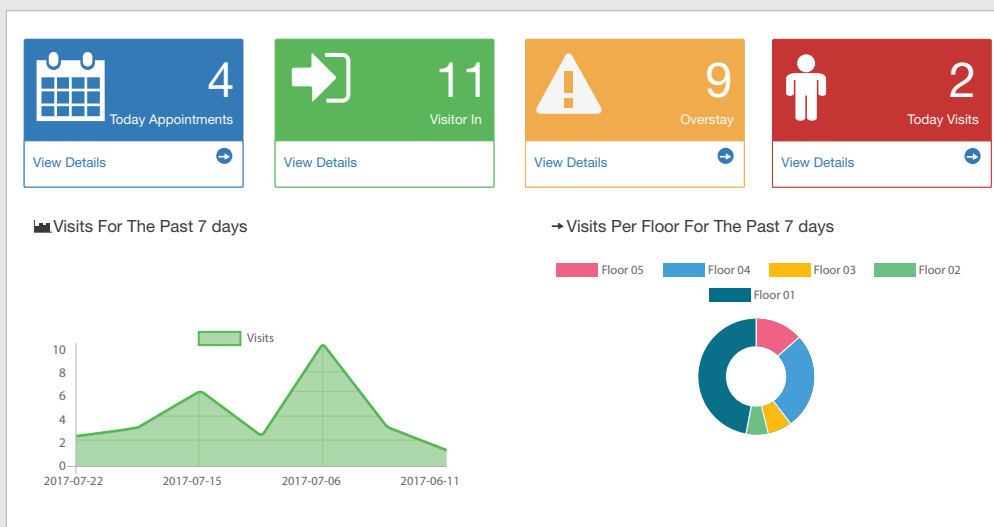

Display number of current accepted appointments

- Visit In:** Display number of current visitors still inside the building

- Overstay:** Display number of visitors exceeded the allowed time duration

- Today Visits:** Display total number of visitors visited on current date

- Visits** Per floor and days

## Fast & Secure Communication among Users

eVMS has been developed to effortlessly interfaced with Active Directory which makes communication among the personals more secure & efficient due to easy accessibility to information.

This allows to identify the eVMS users based on windows accounts available in Active Directory in their domain which provides Single-Singe-On (SSO). Hence, any user accessing the application site will automatically login without promoted to provide the credential.

## Seamless Integration with Databases

This unique feature of eVMS enables users to access external databases like directorates, sections, employees and floors without feeding data manually.

eVMS equipped with powerful feature of auto connection and feeding of required data from external databases like MS Server, My SQL and Oracle.

## VMS- System Administration

- Overall organizational information
- Department details
- Staff details
- Team of employees to function as a group
- Creation of login accounts for a single user or group with assigned privileges.

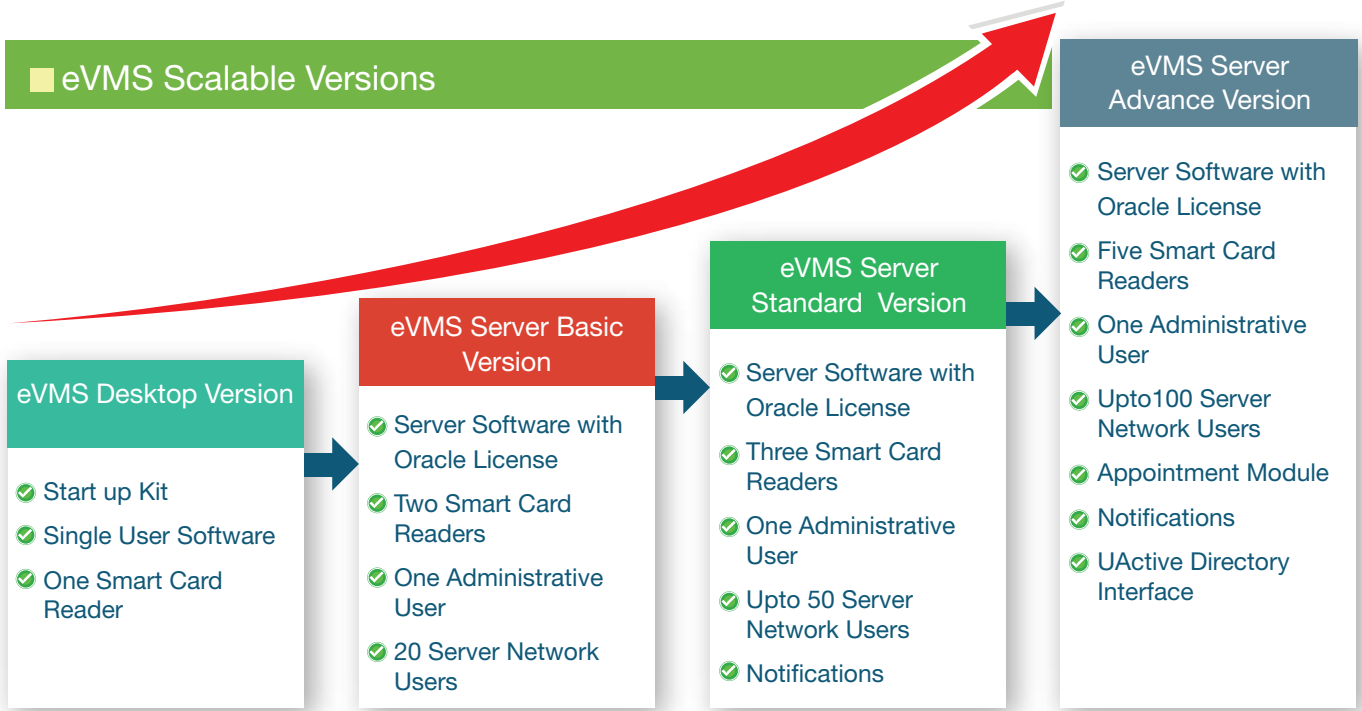

## eVMS Reports

### Reports:

- Daily, Weekly and Monthly visitors information Report
- Current visitors inside premises, time spent by the visitor
- Particular visitor Report, Flexible report fields
- PDF Reports
- Chart Reports, Graphical Reports, and Reports by nationality, Departments, Floor & Division.
- Report of visitor with his photograph generated instantly from a printer for the visitor card. Reporting Tool for customized reports.

## eVMS Scalable Versions

\* Operating with Oracle MySQL Server
